

# The Circle of 5ths

This is the circle of 5ths starting on a C. If you go anti-clockwise from the C, you will be practising the phrases in the order I learnt them in. When you use the backing track, you'll notice the first II-V-I is in the key of Eb so start on the Eb and continue to the Ab, Db and so on. You will still be covering the 12 phrases it's just that the alto sax players are the lucky ones who get to start in their C.

Good luck and let me know on Facebook ([facebook.com/edsaxschool](https://facebook.com/edsaxschool)) if you have any questions.
